Report on usage of library 2022-23

This report examines the usage of the library by students and teachers focusing on the average daily visits. The data collected provides insight into the frequency and extent of library utilization, highlighting its importance as an academic resource within the institution. To gather the required information, the library implemented a login system of soul software that recorded the number of visits made by students and teachers on a daily basis over a specified period. The data collected was then analyzed to determine the average number of visits per day. We first studied the login report from 1 December 2022 to 1 January 2023. Report stated that during this period 1399 users visited the library. To calculate the average daily user, we have to divide this number by working days of library. We get the average number of users ($1399/24=58$) Based on the collected data, it was observed that the library received an average of 58 visits per day. This figure indicates a satisfactory level of engagement with the library's resources and services by both students and teachers

Student usage: Students demonstrated a significant interest in utilizing the library facilities for their academic needs. The availability of study space, access to a vast collection of books, reference materials contributed to their regular visits. The library's calm and conducive environment offered a suitable atmosphere for studying, conducting Research and collaborating on group projects.

Teacher usage: Teachers also showed an active involvement in utilizing the library resources. They made use of the library for their personal research, lesson preparation and accessing educational materials. The availability of specialized books, journals and online databases enabled teachers to enhance the quality of their teaching materials and stay updated with the latest academic advancement.

Conclusion: The data analysis demonstrates that the library serves as an essential resource for both students and teachers within the institution. The average visits per day indicates a substantial level of engagement and highlights the importance of the library in supporting academic endeavors. The findings affirm the value of the libraries diverse collection, supportive environment and collaborative space which contribute to the overall educational experience of the Institution.
